Title	Sustainable Procurement Standard				Owner Name	James Dixon-Gough	

Preface

This Sustainable Procurement Standard will help achieve the vision of becoming a University where sustainability is truly embedded through knowledge, engagement, collaboration and innovation.

It represents a commitment to embed sustainability into University procurement and deliver against the key themes outlined in the University Sustainability Strategy:

- Embedding sustainability through collaboration
- Building knowledge and capacity
- Being a positive Partner in society
- Making the most of resources

The University's business encompasses many internal and external stakeholders both locally and globally, and performs a diverse variety of activities that can impact positively and negatively on a range of environmental and socio-economic issues which include:

- Extraction and use of resources
- Climate Change
- Local and international biodiversity
- Pollution
- Social, economic and community value

The purpose of this Standard is to clearly establish the University's commitment to procure its goods and services in a way that actively promotes and enhances the sustainability of both the University and its suppliers, whilst also ensuring compliance with EU and UK Government policies on procurement.

Governance

Sustainability policy and practice is monitored and implemented by the Sustainable Development Steering Group which includes a representative membership from across the University.

Sustainable Procurement is championed by the Sustainable Procurement Group, which includes membership from Sustainability, Central Purchasing and all five Purchasing Satellites.

The Head of Procurement will ensure this Standard is implemented and maintained.

The Sustainable Procurement Group will monitor compliance against the requirements of the Standard and review performance against objectives. Performance will be reported to the Sustainability Steering Group.

This Standard and related objectives will be reviewed in line with new developments in good practice and legislation by the Sustainability Manager and the Head of Procurement on an annual basis, and will be submitted to the Sustainable Development Steering Group for approval whenever significant changes are made.

Document ID	Version	Issue Date	Current Date/Time	Current User	Review Date	Approve Date	Approved by
2659	1	05 Jan 2016	13 Dec 2016 14:57	Michael Howroyd	05 Jan 2017	05 Jan 2016 16:23	James Dixon-Gough
Title	Sustainable Procurement Standard				Owner Name	James Dixon-Gough	

Scope

The Standard applies to all employees who are involved in the purchase of goods, services or works across the University and its subsidiaries. Specific attention should be paid to the areas with highest levels of risk and opportunity, as identified in Appendix 2.

Tendered Suppliers appointed via a competitive process will also be provided with a copy of the Sustainable Procurement Standard as part of the procurement process, and will adhere to it in all work they perform on behalf of the University.

Requirements of the Standard

Suppliers

- Are expected to follow the requirements of this standard
- Are expected to conform to environmental legal and regulatory requirements
- Must meet core International Labour Organisation (ILO) standards within their own business, sub-contractors and supply chain.
- Must be able to evidence conformance against any performance criteria or sustainability clauses agreed as part of the tender process
- Will support the University commitment to embed sustainability throughout its operations, activities and services
- Should be willing to actively work with the University to secure the most sustainable option within a tender
- Should be willing to work with the University to improve the sustainability of their product or service over the life time of a contract

University Purchasing

- Are expected to implement the requirements and objectives of this standard
- Will ensure that sustainability forms a minimum 10% of the assessment of a tender with a value over £25k
- Will periodically check that suppliers are meeting the requirements , performance criteria and sustainability clauses in category management meetings.
- Will work with suppliers to help them improve the sustainability of the product or service over the lifetime of a contract if necessary.
- Will follow the **Sustainable Procurement (contracted goods and services) Procedure** in its procurement of goods and services for the University
- Will periodically review the procurement commodity groups for sustainability risk and opportunity and use this to inform the procurement process
- Will ensure that purchasing staff receive adequate training and support to meet the requirements and objectives of this standard

Objectives

The Sustainable Procurement Standard sets objectives that will help achieve the strategic commitments from the Sustainability Strategy. It aims to ensure that purchasing activities are managed in a sustainable manner, having due regard to their environmental, economic and social opportunities and impacts and will be implemented through the following objectives

Document ID	Version	Issue Date	Current Date/Time	Current User	Review Date	Approve Date	Approved by
2659	1	05 Jan 2016	13 Dec 2016 14:57	Michael Howroyd	05 Jan 2017	05 Jan 2016 16:23	James Dixon-Gough
Title	Sustainable Procurement Standard				Owner Name	James Dixon-Gough	

1) Embedding sustainability through collaboration

- Build on external engagement with suppliers, procurement partners and the wider community to encourage sustainable practices
- Identify and develop partnership projects that increase influence over key supply chains in order to improve sustainability performance.
- Promote and make full use of “value added” services offered by suppliers, e.g. the collection and recycling of previously supplied items.
- Work with partners across and beyond the campus to encourage sharing and reduced resource use.

2) Building knowledge and capacity

- Support and encourage suppliers to be compliant with any current and future environmental and social legislation.
- Ensure that all tendered suppliers are assessed against their environmental and social credentials, providing training where applicable.
- Work towards achieving and maintaining level 4 of the Government issued Sustainable Procurement Flexible Framework
- Identify opportunities to help build the capacity of suppliers to deliver more sustainable goods and services
- Ensure that all staff involved in purchasing activities have an understanding of sustainability issues and best practice

3) Being a positive partner in society

- Ensure we consider social and community benefits of goods/services (in accordance with the Public Services (Social Value) Act 2012), where possible
- Utilise our supply chain, where possible, to maximise opportunities for students
- Improve the proportion of Fair Trade and ethically sourced goods that the University procures
- Ensure that we take active steps to recognise and address poor labour standards and other ethical issues in our procurement.

4) Making the most of resources

- Ensure relevant sustainability issues and opportunities are considered as part of the purchasing process during the specification and/or evaluation stage, e.g.:
 - Climate change
 - Circular economies
 - Ethics and labour standards
 - Social value
 - Pollution
 - Resource extraction and use
 - Biodiversity & ecosystems
- Utilise a ‘whole life costing’ approach to the purchase, usage and disposal of goods and services.
- Ensure performance criteria against agreed sustainability criteria are written into contracts and are actively monitored.
- Encourage contracted suppliers to provide more sustainable products and services where available

2659	1	05 Jan 2016	13 Dec 2016 14:57	Michael Howroyd	05 Jan 2017	05 Jan 2016 16:23	James Dixon-Gough
Title	Sustainable Procurement Standard				Owner Name	James Dixon-Gough	

A plan for achieving these objectives can be found in Appendix 1.

Associated procedures and guidance

The following are used to implement the requirements and objectives of this standard:

Sustainable Procurement (contracted goods and services) Procedure: This describes the process for managing sustainability risks and opportunities within University tenders.

Sustainability Risk Matrix: A result of the assessment of sustainability risk & opportunities of commodity groups by the Sustainable Procurement Group. Used to identify the correct procedure to follow (found within the Sustainable Procurement Procedure).

Category Management Risk Log: Used by category managers to identify the likely sustainability risks and opportunities within a commodity group. This will help inform tenders, contractual requirements and form party of supplier meetings.

Savings log: Used to track the value of sustainability within new contracts.

Signed

Tim Brannon
Head of Procurement

Date: 14th December 2015

Louise Ellis
Head of Sustainability

Date: 4th December 2015

Appendix 1 – Sustainable Procurement Objectives 2015-16

Performance against objectives and action will be reviewed at the Sustainable Procurement Group. Objectives and actions will be reviewed on an annual basis.

Objective	Actions/Tools	KPI	Responsibility
1	Embedding sustainability through collaboration		
1.1	Build external engagement with suppliers, procurement partners and the wider community to encourage sustainable practices	<ul style="list-style-type: none"> Review and collaborate with other organisations who deliver sustainable purchasing best practice Identify commodity groups where there is potential to increase resource efficiency & increase sharing or improve sustainability performance Identify potential suppliers/partners that can help meet objectives and use tenders & supplier meetings to develop opportunities. 	Number of suppliers/partners helping to meet objective. Sustainable Procurement Group
1.2	Promote and make full use of services offered by suppliers	<ul style="list-style-type: none"> Use the Sustainability Risk Matrix and process flow chart to identify high impact spend areas Identify and action opportunity areas as part of Category and Sub-Category strategy development Identify “value added” services through the tender process, transactional procurement or contract management and incorporate into future contracts. 	Number of sustainability SMART “savings” logged for transactional and high-value purchases Sustainability considerations captured in Category and Sub-Category strategies Category and Sub-Category Leads All Purchasing Staff
1.3	Identify and develop partnership projects that increase influence over key supply chains in order to improve sustainability performance.	<ul style="list-style-type: none"> Identify suppliers/partners who we can work with to mutually improve performance. 	Number of suppliers targeted for development via tender/contract management processes Number of supplier where partnerships have led to measurable sustainability improvement All Purchasing Staff
