

# Avoiding Maladaptation in Climate Change Adaptation Program: Indonesia Case Study

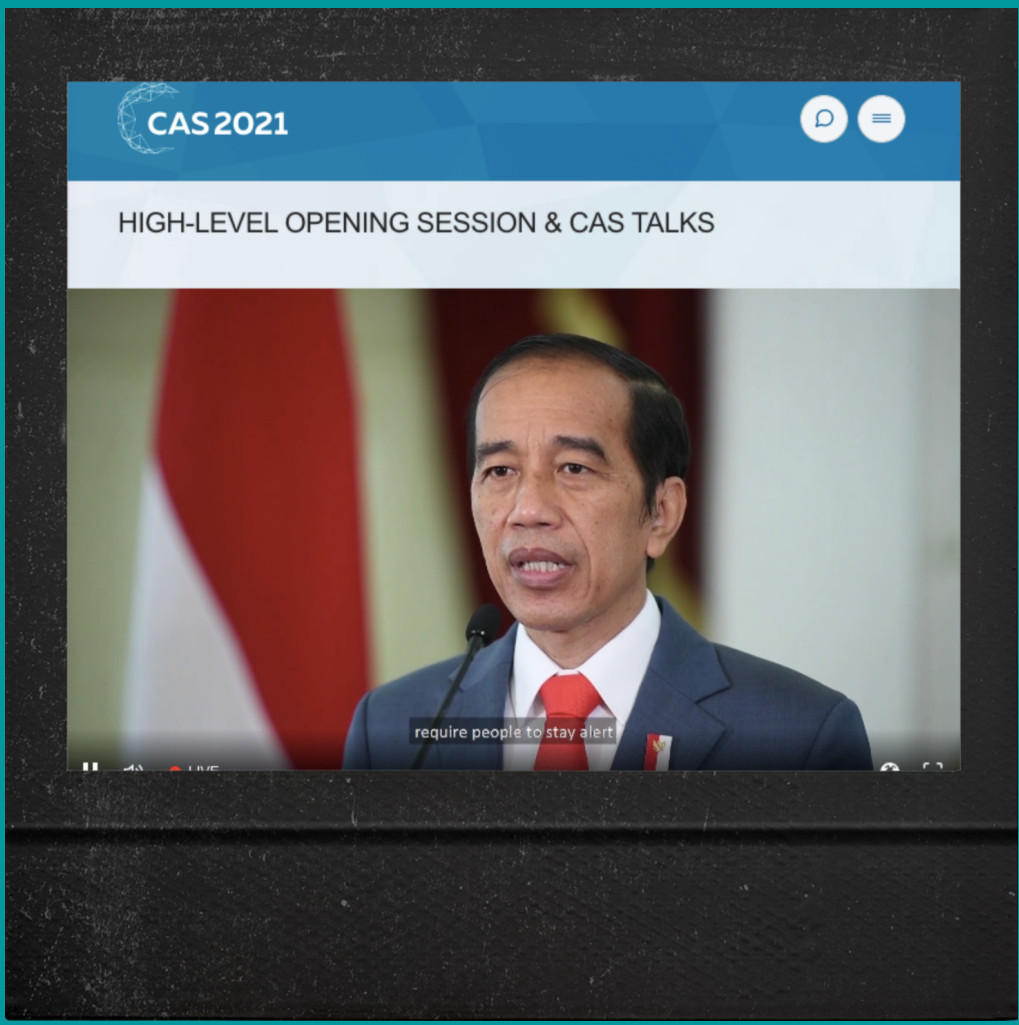

Stanislaus Risadi Apresian  
Postgraduate Researcher at the School of Politics and International Studies  
University of Leeds  
email: ptsra@leeds.ac.uk

## Multilevel Governance

### Paris Agreement

- International negotiations
- National adaptation plan
- Nationally Determined Contributions
- Indonesia's pledges: 20,000 climate village programs

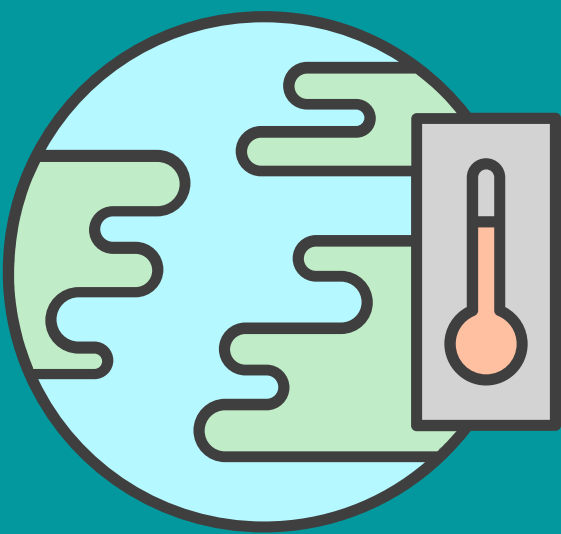

### National Action Plan on Climate Change Adaptation

Adaptation intervention program  
Overshadowed by mitigation  
Multi-sector & Multi-actor  
Horizontal governance  
Sectoral ego

### Provinces, Cities, & Regencies

- Vertical governance
- Exclusion of local actors in policy making
- Lack of central-local coordination
- Lack of incentives to change the behaviour
- The ambiguity of vulnerable concept
- No clear mandate for adaptation

### Indonesian farmers

### 3 outcomes of adaptation intervention:

- Positive impact, better adaptive capacity
- No impact, unsustainable program
- Maladaptation, exacerbate vulnerability condition
